

PAYOFF PITCH BASEBALL QUICK RESULTS

Quickly determine the winning team and score. Find the home team on the rating sheet and roll two six-sided dice (2d6) and total the result. Find the visiting team's Grade (A-F) and compare the 2d6 total to the range of numbers under the column that corresponds to the visiting team's grade. If the 2d6 total is within the range of numbers listed, the home team has won the game. If the 2d6 total is not in the range of numbers listed, the visiting team wins the game. If desired, there are two methods of determining the final score of the game once the winner and loser has been determined. The Basic and Advanced scoring options are below.

Example using 2019 Milwaukee Brewers hosting the 2019 St. Louis Cardinals, look under the column vsA on Milwaukee's line to get a win range of 2-6, 11. If the 2d6 total is 2, 3, 4, 5, 6 or 11, the Brewers win the game. On rolls of 7, 8, 9, 10 and 12 the Cardinals win.

When the home team win range is a 2*, a second roll of the 2d6 is required to determine the winning team. If the initial 2d6 roll total is 2, roll the dice again. If the second dice roll total is 2, the home team wins. If the initial roll or the second roll is 3, 4, 5, 6, 7, 8, 9, 10, 11 or 12, then the visiting team wins the game.

BASIC Score determination method

Roll all four dice. Compare the two ten-sided dice (also referred to as d10 or percentile dice when read to create a number from 00 to 99). If one die is greater than the other, the winning team scores the number of runs on the high die and the losing team scores the number of runs on the low die. Whenever the percentile dice are doubles or equal to one another, compare the 2d6 assigning the higher die number to the winning team and the lower die to the losing team. If there are doubles on the 2d6, then add the 2d6 total to the number showing on the d10 to determine the winner's score. The losing team will receive the number of runs showing on the d10.

ADVANCED Score determination method

After the winner has been determined, roll the percentile dice and refer to the winning team's SO rating. If the percentile dice result is equal to or lower than the number listed, the winning team wins by shut out. Re-roll all four dice. The winning team's score is either the lower of the two d10 or the non-zero die result if one of the d10 is showing 0. If the percentile dice are doubles, then consult the Shut Out table using the 2d6 total.

If the percentile dice result is higher than the winning team's SO number, then refer to the two d10 to determine the final score. The winning team scores the number of runs equal to the higher ten-sided die and the losing team scores the number of runs equal to the lower ten-sided die result. For example if ten-sided dice result is 5 and 3, the winning team would score 5 runs while the losing team scores 3 runs. If the winning team did not shut out the losing team and one of the ten-sided dice is 0, refer to the Normal chart in the middle of the bottom of the page next to the Big Game charts. Use the non-zero d10 to determine the final score of the game. For example if the two d10 resulted in 6 and 0, find the number 6 on the Normal chart. The result and final score of the game is 3-1.

Continued on next page.

PAYOFF PITCH BASEBALL QUICK RESULTS

If the d10 dice roll resulted in doubles, then re-roll all four dice to determine the score of the game. First read the percentile dice to determine a number from 00 to 99 and refer to the Big Game Win chart. A roll of 00 to 43 on the ten-sided dice will give the final score for both teams. A roll of 44 to 99, will yield the winning team's score (10 to 20 runs scored). To determine the losing team's score, total the 2d6 and refer to the Big Game Loss chart to find the losing team's score (1 to 9).

Big Game Win		Big Game Loss
